

Watermarks

Creating a watermark is probably the easiest way to add a simple text block that will always print. From the main menu, click **Document**, select the **Watermark** option and choose **Add** for a new watermark.

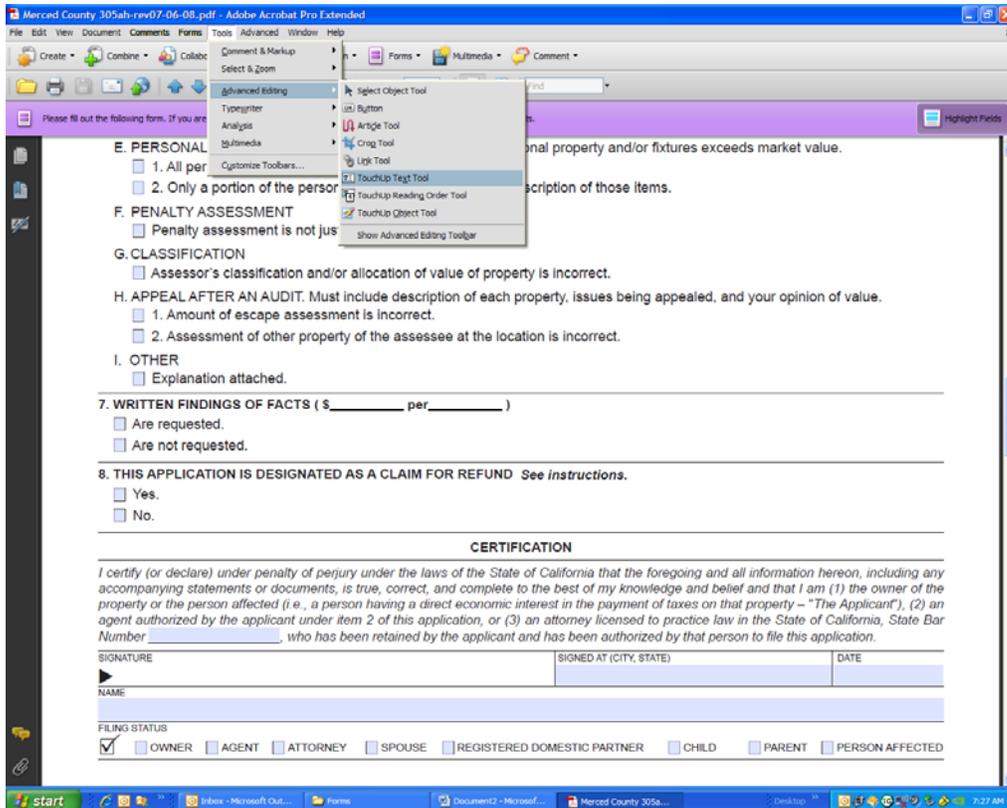

An example of the Adobe Acrobat "watermark" dialog page is shown below. Type the text into the text area in the **Source** section, and specify the font, size and paragraph layout. For the example, Arial 12 pt is selected. Uncheck **Scale relative to target page**. Set the **Position** to be 0.5 inches from the top and right. Click **Page Range Options...** and set the **Pages from 1 to 1**. Click the **Save Settings...** button to name and save your settings. Press **OK** when finished. Then save your file, perhaps using **Save As** with a different name than the original source.

Touch Up Text

There may be other areas that require minor text editing. The "Touchup Text" tool is used for this purpose. Click **Tools** → **Advanced Editing** → **Touchup Text Tool**. These screenshots are Acrobat Pro version 9; previous versions have slightly different menu configurations.

In the example on the next page, section 7 is changed to show the correct amount for written findings of fact.

After the **Touchup Text Tool** is selected, the system fonts are loaded by Acrobat. Place the cursor on the line of text to be edited and use backspace or delete to clear the characters to be changed; type your text.

In the example, WRITTEN FINDINGS OF FACTS \$ _____ per _____ has been changed to \$ 100 per parcel.

Save the document to preserve your edits.
