

Proposed comments on Solar Energy Systems New Construction Exclusion

Barry:

I've reviewed the above-referenced LTA and have a few questions I am hoping you can help me with:

1. It is called the 2020 Solar Energy Power Plan Property Statement, and it asks a lot of questions that are only applicable to a utility scale active solar system. Should we view this form as only being applicable to utility scale systems?
2. If the answer to 1 is no, will you be releasing a separate form for smaller installations (like those on homes)? It seems like an overwhelming amount of information for a homeowner or a small installer to be able to complete.
3. Can you also give me an idea of what this larger project looks like going ahead. As best I can tell based upon the LTA, it says the project will include reporting requirements (this part, I assume), assessment issues, change in ownership, and new construction exclusion. Is the idea that this larger project will be done in stages covering those topics? Other?

If it would be more helpful to talk over the phone, I'd be happy to, but I wanted to go ahead and get these questions to you in case you prefer to respond by email.

Thank you,

Bradley R. Marsh
